# ROUND GLASS TOP DIGITAL KITCHEN SCALE

Models 1336 / 1337 / 1338

## Operating Instructions

## Instructions for use

Remove all packaging before first using the scale.

### FUNCTION KEYS

1. Before first using the scale, insert the CR2032 lithium battery provided, in the battery compartment at the bottom of the scale making sure the positive '+' side faces up.

2. Place the scale on a hard, level surface. If you intend using a bowl or container, place it on the platform first before switching it on.
3. To turn the scale on, press 'ON/TARE'.
4. The full display appears for about 2 seconds before it 'zeroes' indicating it is now ready for use.
5. Should you wish to change the unit measure, press 'UNIT'. The screen displays in the following sequence -  
lb...ml...g...oz.
6. Place the object or ingredients directly onto the platform, or in the bowl or container placed securely on the platform. Ensure the scale readout shows zero before weighing, otherwise, press 'ON/TARE' to reset it.

## To use the tare weighing function

This scale allows the separate weighing of items as they are added onto the scale. No need to empty the bowl or container!

1. After weighing the first item on the scale and with this first item still on the scale, press 'ON/TARE' to reset the display to zero. 'Tare' appears to the left of the screen confirming this mode.
2. Add the second item to the scale. The scale will now display the weight of the second item only.
3. If you have additional items to weigh, repeat Steps 1. and 2. The total weight of all the items on the scale (including the bowl or container if using one), must not exceed the capacity of the scale, which is 3000g / 105.8oz / 6.6lb / 3000ml.
4. The total weight of the items on the scale, (including the container or bowl if using one), can be obtained by first pressing 'ON/TARE', then removing all items off the scale. The total weight will be displayed as a negative figure.

## To turn the scale off

Turn the scale off anytime by holding down 'ON/TARE' for approximately 3 seconds. Otherwise, if left idle, the scale will switch off automatically after about 60 seconds.

## To measure water

*The scale measures water volume in mls only*

1. Place the container or jug on the scale before switching it on.
2. After you have turned the scale on, press 'UNIT' and select the 'ml' unit
3. The scale is ready for use when it is 'zeroed'
4. Begin pouring water into the container, checking the display at the same time. Stop when the volume reaches your need.
5. Tare feature functions as normal

## Overloading

If the scale is overloaded, 'EEEE' will be displayed. Remove the weight immediately or damage to the scale may occur.

## Low battery indicator

The low battery symbol will appear on the readout indicating the battery needs to be changed. Replace the battery with a fresh, good quality lithium one, making sure the '+' symbol is faced up.
